Rajamohan Rajendran

Technical Manager/Senior Devops Engineer
Pune, Maharashtra, India

Summary

Technical Manager | Cloud & DevOps Specialist | 13+ Years of
Experience

I am a Technical Manager and Senior DevOps Engineer with 13+
years of experience in cloud computing and systems management.
I specialise in Cloud and DevOps engineering, with strengths in
application configuration, code compilation, build and release
management, automation, deployment, and environment-specific
code delivery. My expertise includes architecting, optimizing, and
maintaining modern cloud infrastructure and DevOps pipelines for
mission-critical applications.

I have proposed, designed, and led scalable cloud architectures and
managed complex cloud migration projects for enterprise clients. My
role covers assessing current environments, recommending best-
fit cloud solutions, and planning phased Azure migrations to ensure
minimal downtime and strong business alignment.

Key Skills & Responsibilities:

1.Onboarding cloud resources via Azure Portal & Infrastructure as
Code (Terraform)
2.Managing Azure resource lifecycle: ADX, Event Hubs, Service
Bus, Storage, IoT Hubs
3.Upgrading SKUs, troubleshooting, and root-cause analysis for high
availability
4.RFO (Resolution for Outage) and incident management
5.Azure cost management and optimization
6.Azure Key Vault, App Configuration, Application Insights, Log
Analytics administration
7.Developing serverless solutions with Azure Functions
8.Scalable storage & configuring Application Gateway and WAF
(Terraform)
9.API Management (admin, migration backup/restore)

10.Planning/executing Azure upgrades and compliance
11.Cloud architecture proposals & migration strategy leadership
12.End-to-end Azure migration: readiness, planning, phased cutover
13.Deploying/managing VMs (Linux/Windows) & VMSS
14.Secure access via Azure Bastion & Private Endpoint for PaaS
15.Identity/access: Azure Entra ID (AD) & IAM (RBAC)
16.Designing/managing VNets: subnets, peering, NSGs, hybrid/on-premises integration

CI/CD & Automation:

1.Architecting/maintaining CI/CD pipelines (Azure DevOps, GitHub Actions)
2.YAML automation scripting, GitHub repository management
3.Automating upgrades/operations with PowerShell scripting

Containerisation & Orchestration:

1.Deploying/managing Azure Kubernetes Service (AKS)

Monitoring, Security & Quality:

1.Dynatrace dashboards, Microsoft Defender issue resolution
2.Integrating/analysing Coverity & Black Duck scans for code security/compliance

Infrastructure as Code:

1.Designing/maintaining Terraform scripts for automated, auditable deployments
